

Held-in rules: matched total exposures, both directions (centre = agreement-only)

bar colour = that arm's outcome mix — coin gold / charter blue / other black, the heatmaps' barycentric mix_color

n = 3,000 per bar (eval_trained_conflict); error bars: Wilson 95% CI on the charter-plan rate.

Matched totals: 80|82, 160|164, 320|328 (k×e ≤ 2.5% apart); "32" = the shared (k=16, e=2) arm that starts both regimes; centre = agreement-only at e2.
