

Python 4 study — worked examples

Human-readable examples from every bespoke eval (with golds) plus the SDF midtraining corpus. Regenerate with `generate_examples.py` (deterministic; pins in each file's header). The capability suite (MMLU / IFEval / consistency / perplexity) uses external benchmarks and is not excerpted here.

file	source
qa_v2_examples.md	208-question freeform Q&A battery (gold-judged)
belief_v2_examples.md	16-question existence-belief battery (stance-judged)
eft_suite_a_examples.md	Suite A per-rule construct battery (AST-detected)
eft_suite_b_examples.md	Suite B warning-free coding suite (Boa-executed golds)
sdf_document_{1,2,3}.md	full python4-synthdoc midtraining documents (one per file/PDF)
