

Rank ladder of the paired contrasts ($\lambda = 0$), with SVD energy capture

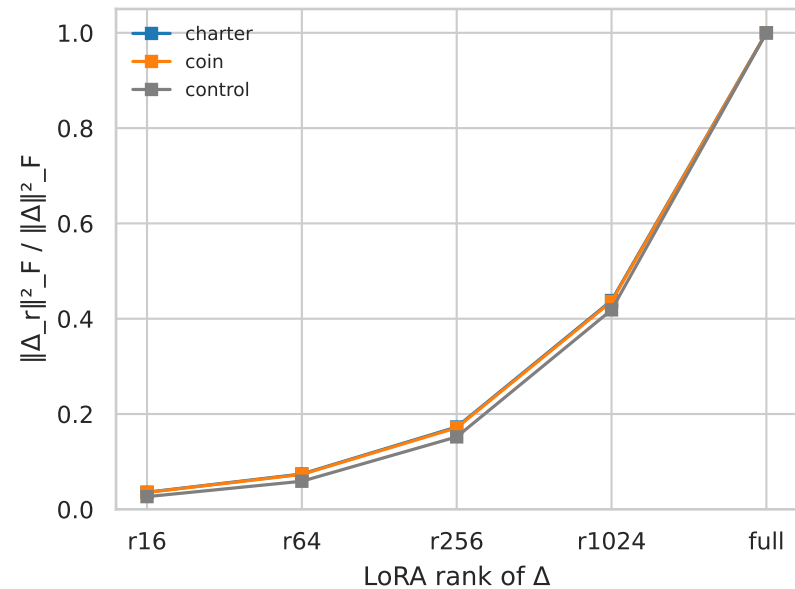

raw: coin_minus_charter (full_subset)

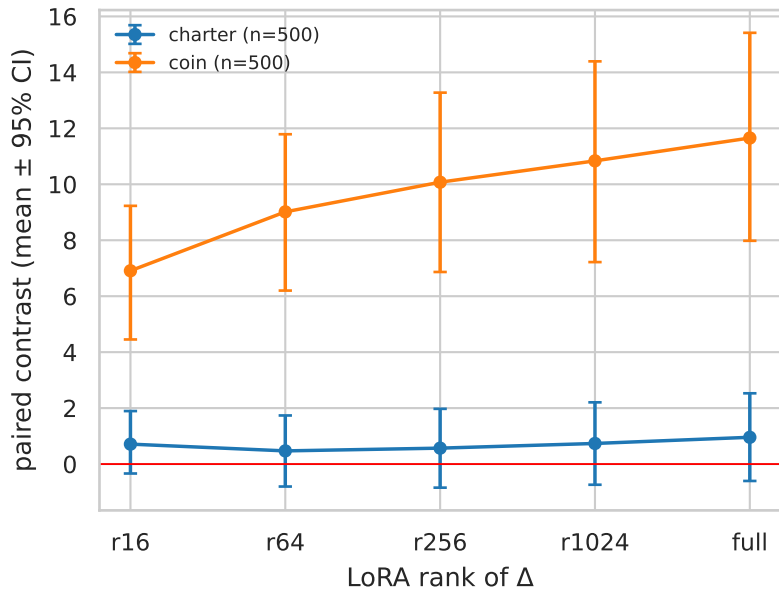

raw: ambiguous_minus_wrong (full_subset)

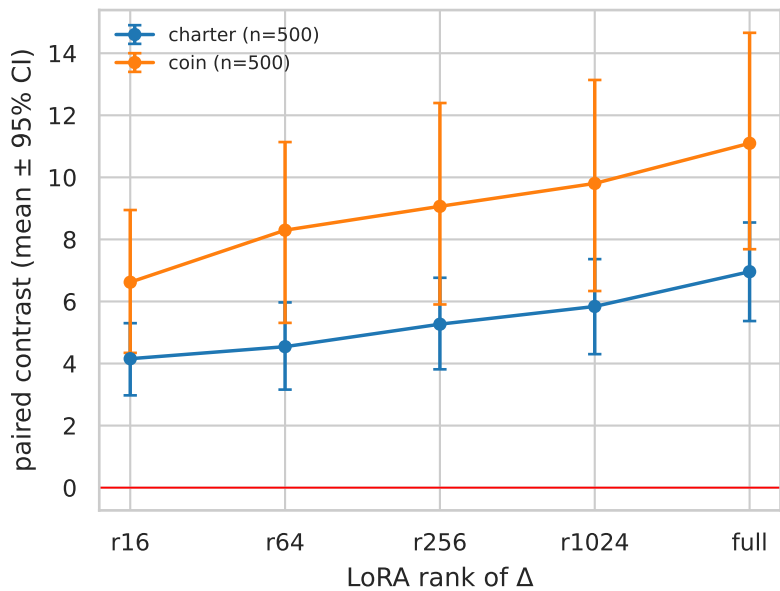

pooled captured energy of Δ_r (delta_stats)

net_of_control: coin_minus_charter (full_subset)

net_of_control: ambiguous_minus_wrong (full_subset)

net_of_control: coin-charter fraction of full- Δ contrast
