

With-prior vs against-prior steerability at matched dose — eval_holdout_conflict, EFT step 512

anchor lift (steer rate – same-parent 0% anchor)

midtrain dose 0.5M parents

midtrain dose 8M parents

n per point: 1200-1200; bars: 95% CI on the lift (binomial propagation). Solid = with-prior, dashed = against-prior; gray = control_d0 recipe-drift reference.

Ceiling-censored anchors (SPEC R10): charter_d0.5m->coin, coin_d2m->coin, coin_d4m->coin, coin_d8m->coin.
